CONCERNED ABOUT MOLD!

Mold Inspections - Clearance Testing - Sampling

Air Samples - an air test requires at least two samples; one outdoor sample for a baseline standard and one indoor sample within 1000 sq feet of infected area. An air test will indicate what type of mold is in the air and quantify a spore count.

Surface Samples - a surface sample is used to identify a type of mold growing only on a surface but will NOT quantify. Surface samples do not indicate what is in the air.

Please call for further information, to schedule your inspection, and to receive a quote. Prices will include a physical inspection, sample collection, lab analysis, and a detailed report.

HOME INSPECTION ADD-ON SPECIALS

Add a mold inspection with two (2) Air Quality tests To Your Home Inspection for Only \$250.00. That's 50% off the stand alone price - We have the best prices in the industry!
